

How to find your logon details on a Mac

1. Login to your Mac
2. Press the Apple icon and choose 'System Preferences..'
3. Under 'Internet & Network' click on Network.
4. Highlight 'Ethernet' and read your IP Address.
5. While on this window press [Advanced] and then choose the [WINS] tab.
6. Read the NetBIOS Name. That's your computer's name.
7. Read the Workgroup. That's the domain your computer is in. In most cases this should be 'UNCLE'.
