\*\* DOES include proceedings

<http://catalogue.bl.uk>

*Index of Conference Proceedings* lists conference proceedings newly acquired by the British Library and available for loan or document supply. The British Library acquires the proceedings of all significant conferences held worldwide regardless of subject or language and currently holds the proceedings of over 450,000 conferences. *Please note* that we no longer produce the monthly *Index to Conference Proceedings*. The annual cumulation will continue to be offered. All records included in the index are now available free of charge via the Website as part of the Document Supply Conference File on the [Integrated Catalogue](#).
